

Biorhythm Calculator Portable is a software utility which can be used in order to find out your daily biorhythm according to your birthday, as well as what may be your best and worst days. Use it on the fly Since this is the portable edition of Biorhythms Calculator, you are not required to go through the installation process. As a consequence, the Windows registry and Start menu/screen are not going to suffer any changes and no leftovers will remain on the hard disk after you delete it. It is also important to keep in mind that if you place the program files to an external data device (e.g. pen drive), you make it possible to run Biorhythms Calculator Portable on any PC you have been granted access to, by clicking the EXE. Input birthday and easily access results and reports This application enables you to display some information about your biorhythm. It consists of several cycles, namely physical, emotional, intellectual, spiritual, awareness, aesthetic, intuition and average. In order to reach any results, you are required to input your date of birth, as well as the day for which you want to check the data. You can view a graphical representation and percentage values of your daily biorhythm in the main window, while also a report is going to be brought up explaining all the cycles at length. In addition to that, you can view the dates of your best and worst days, as well as the percentage of biorhythm compatibility with others and your significant other. Conclusion and performance The amount of resources required by Biorhythms Calculator Portable in order to work properly is insignificant, all results are going to be brought up quite fast and the interface is suitable to power and novice users. Taking all of this into consideration, we can safely say that it is an efficient and reliable piece of software. What's new in this version: Thanks for rating the software 5/5, I will continually make this application better with ongoing improvements. * You can now convert each day of the month to the day of the week on the fly by clicking the little "menu" button on the left side of the text box that displays the date entered. * Now you can specify the month, date, and year of the birth. Only the year can be changed now. Some of you may find the program a bit slow on a low end PC
