## About This Game

Is this infinite ring heaven or hell---?  
Turn round and round, this is a dream.  
The outside that we looked once.  
Just only for that, it continues turning around.  
----Whirl walk----

This game is the Metroidvania action game.  
It is 2D map, but, with a characteristic rotary view, the screen scrolls and turns.  
You get weapons and actions by exploration, and let's conquer the tower.

Default language is Japanese.  
Please change a language from a menu "FRAME SETTING" in the game if you want to play an English version.

---

But it may not be appropriate translation because it is machine translation basically.
